Buffalo Distribution in the World

SENTRA POPULASI KERBAU TAHUN 2019-2020

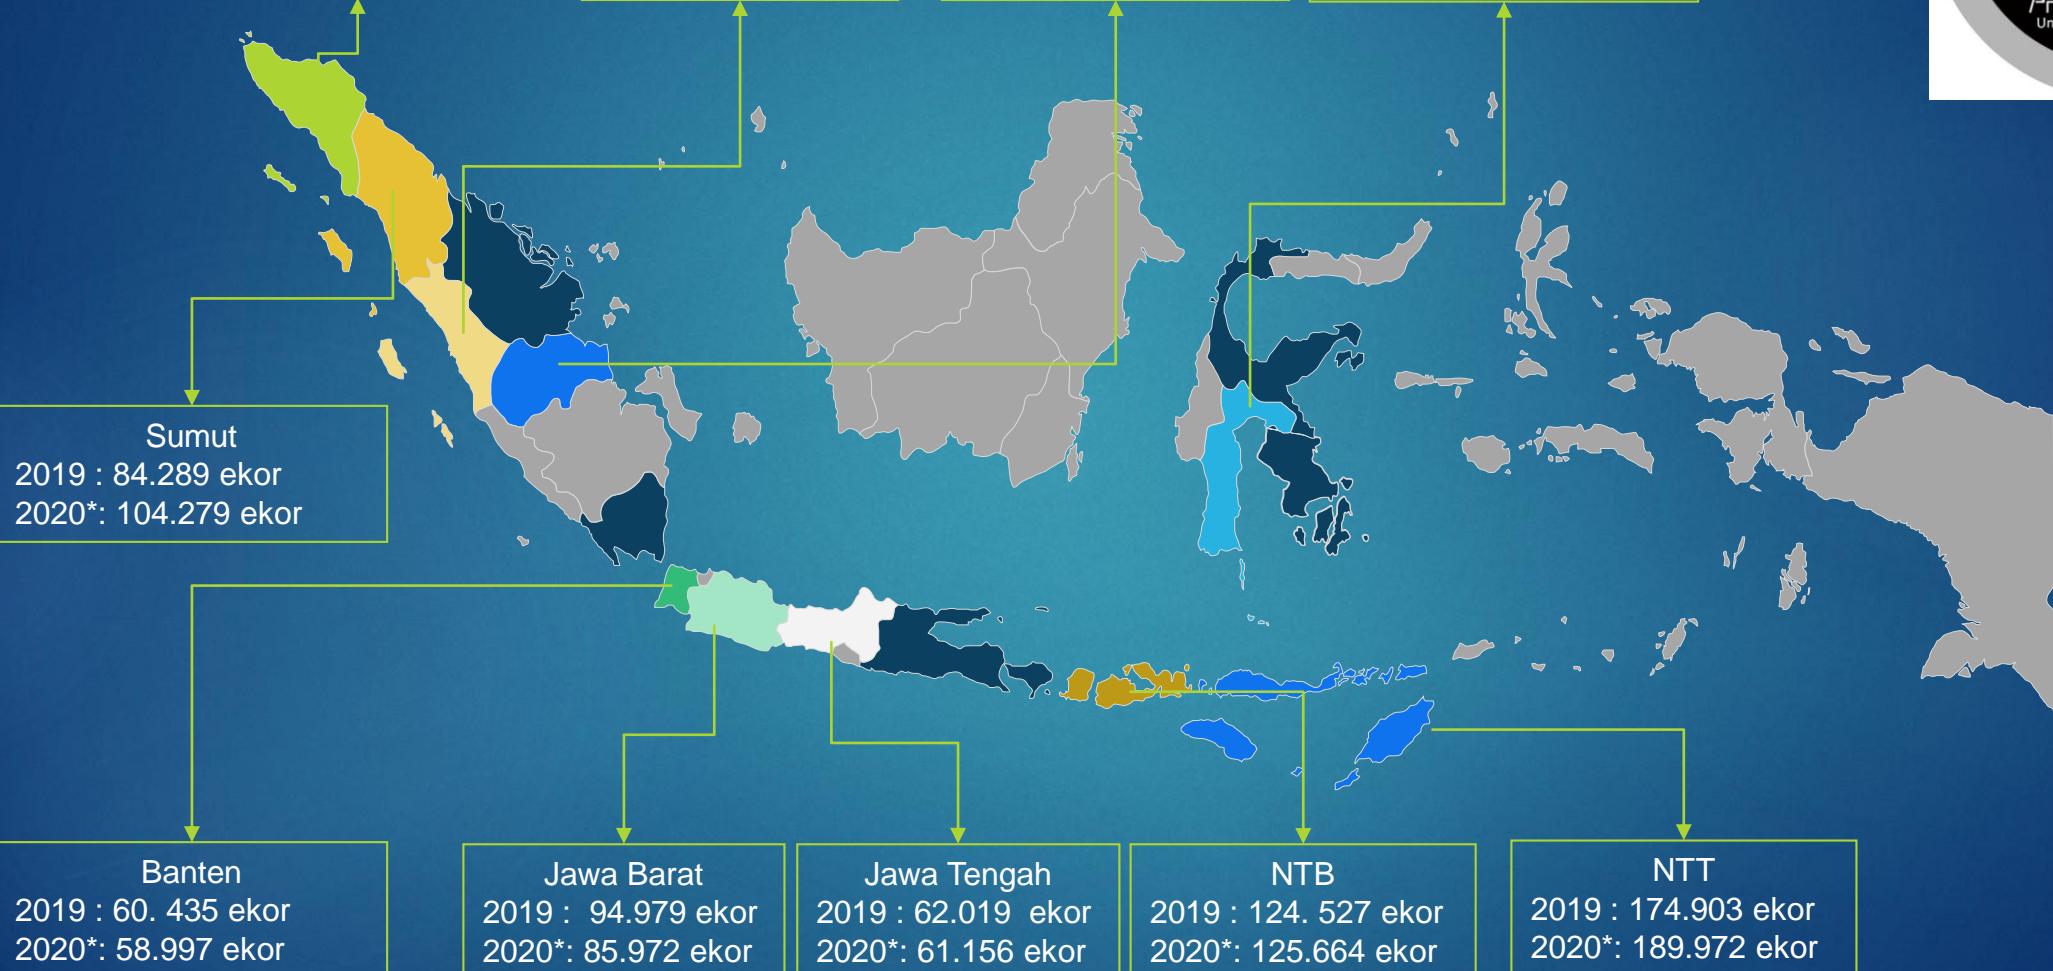

Aceh
2019 : 87.995 ekor
2020*: 89.319 ekor

Sumatera Barat
2019 : 84.289 ekor
2020*: 85.519 ekor

Jambi
2019 : 45.657 ekor
2020*: 45.512 ekor

Sulsel
2019 : 96. 565 ekor
2020*: 118.190 ekor

Buffaloes have an important role religiously, socially and economically

Buffalo Database in East Kalimantan 2015-2020

The Distribution of Buffalo Livestock Population Percentage by Region

The Distribution of Meat Production Percentage by Region

Buffalo Farm Characteristics

Based on observation at buffalo farming (respondents) were shown the sex ratio 1:4, which are from 351 heads of buffalo consists 63 male and 268 female .

Muara Muntai – East Kalimantan

Muara Wis –East Kalimantan

East Kalimantan province, which has stout lakes, rivers, and swamps, is the original habitat of Kalang Buffalo since hundreds of years ago, and in 2012 Kalang buffalo has been set as genetic resources (plasmanutfah) originally from East Kalimantan province

Kalang Buffalo Farming Systems

The production system of the Kalang buffaloes have differences on animal handling and farming system in dry and rainy season/flooding season.

*During dry season, used extensive farming system,
Conversely, for the rainy/flooding season, semi intensive systems were used*

Why Buffalo

- Ruminant are capable of utilizing fibrous feeds (Deng et al.,2007)
- Buffalo is one of **potential commodity** in supplying the meat due to the ability of buffaloes are able to digest crude fiber better 2–5% higher than cattle.
- The nutritional content of Kalang **buffalo meat** (low calories and fat), and it is good for human consumption from health point of view.
- Buffaloes have an **important role** religiously, socially and economically.
- Improving Buffalo **farming systems** through applied technology and optimize local resources comprehensively .
- Development buffalo become essential to support **meat industry**

Buffalo VS Cattle

Komposisi daging kerbau dan sapi (per 100 g daging tanpa lemak)

Kandungan	Daging kerbau	Daging sapi
Air (g)	76,30	69,35
Protein (g)	20,39	19,05
Total lipida (g)	1,37	10,19
Abu (g)	0,98	1,05
Energi (kkal)	173	99
Asam lemak jenuh (g)	0,460	4,330
Asam lemak tidak jenuh tunggal (g)	0,270	0,380
Asam lemak tidak jenuh ganda (g)	0,270	0,380
Kolesterol (g)	46	59
Besi (mg)	1,61	2,16

Naveena BM, Kiran M. (2014). Buffalo meat quality, composition, and processing characteristics: Contribution to the global economy and nutritional security. Animal Frontiers. 4(4):18-24. doi:10.2527/af.2014-0029

Buffalo VS Cattle

Karakteristik kualitas daging kerbau dan sapi

Karakteristik	Daging kerbau	Daging sapi
Persentase karkas dari bobot hidup (%)	51-53	52-54
Nilai pH akhir	5,56	5,47
Daya ikat air (%)	15,33	37,00
Kandungan kolagen (mg/g daging)	0,67	0,37
Kandungan mioglobin (mg/g daging)	4,0-6,0	3,0-5,0
CIE L* (<i>lightness</i>)	34,47	33,2-41,0
CIE a* (a*>0 merah; a*<0 hijau)	12,21	11,1-23,6
CIE b* (b*>0 kuning; b*<0 biru)	10,93	6,1-11,3
Warner-Bratzler shear (N)	40,52	16,9-59,9

Buffalo VS Cattle

Karakteristik	Daging kerbau (buffalo steers)*	Daging sapi (<i>brahman</i> cross steers)*
Lemak subkutan pada otot longissimus dorsi	+	++
Warna lemak	Putih (relatif seragam)	Putih krim hingga putih kekuningan
Jaringan ikat	++	+

* Setelah pemotongan, **karkas digantung dan disimpan pada suhu 0-4 °C selama 48 jam**, kemudian diuji

Robertson J, Bouton PE, Harris PV, Shorthose WR, Ratcliff D. (1983). *A Comparison of Some Properties of Beef and Buffalo (Bubalus bubalis) Meat*. *Journal of Food Science*, 48(3), 686–690. doi:10.1111/j.1365-2621.1983.tb14876.x

Karakteristik	Daging kerbau	Daging sapi
Lemak intramuskular (<i>marbling</i>)	+ Lemak lebih di subkutan	+++

Tamburano A, Tavazzi B, Callà C, Amorini A M, Lazzarino G, Vincenti S, Zottola T, Campagna M C, Moscato U, Laurenti P. (2019). Biochemical and nutritional characteristics of buffalo meat and potential implications on human health for a personalized nutrition. *Italian journal of food safety*, 8(3), 8317. <https://doi.org/10.4081/ijfs.2019.8317>

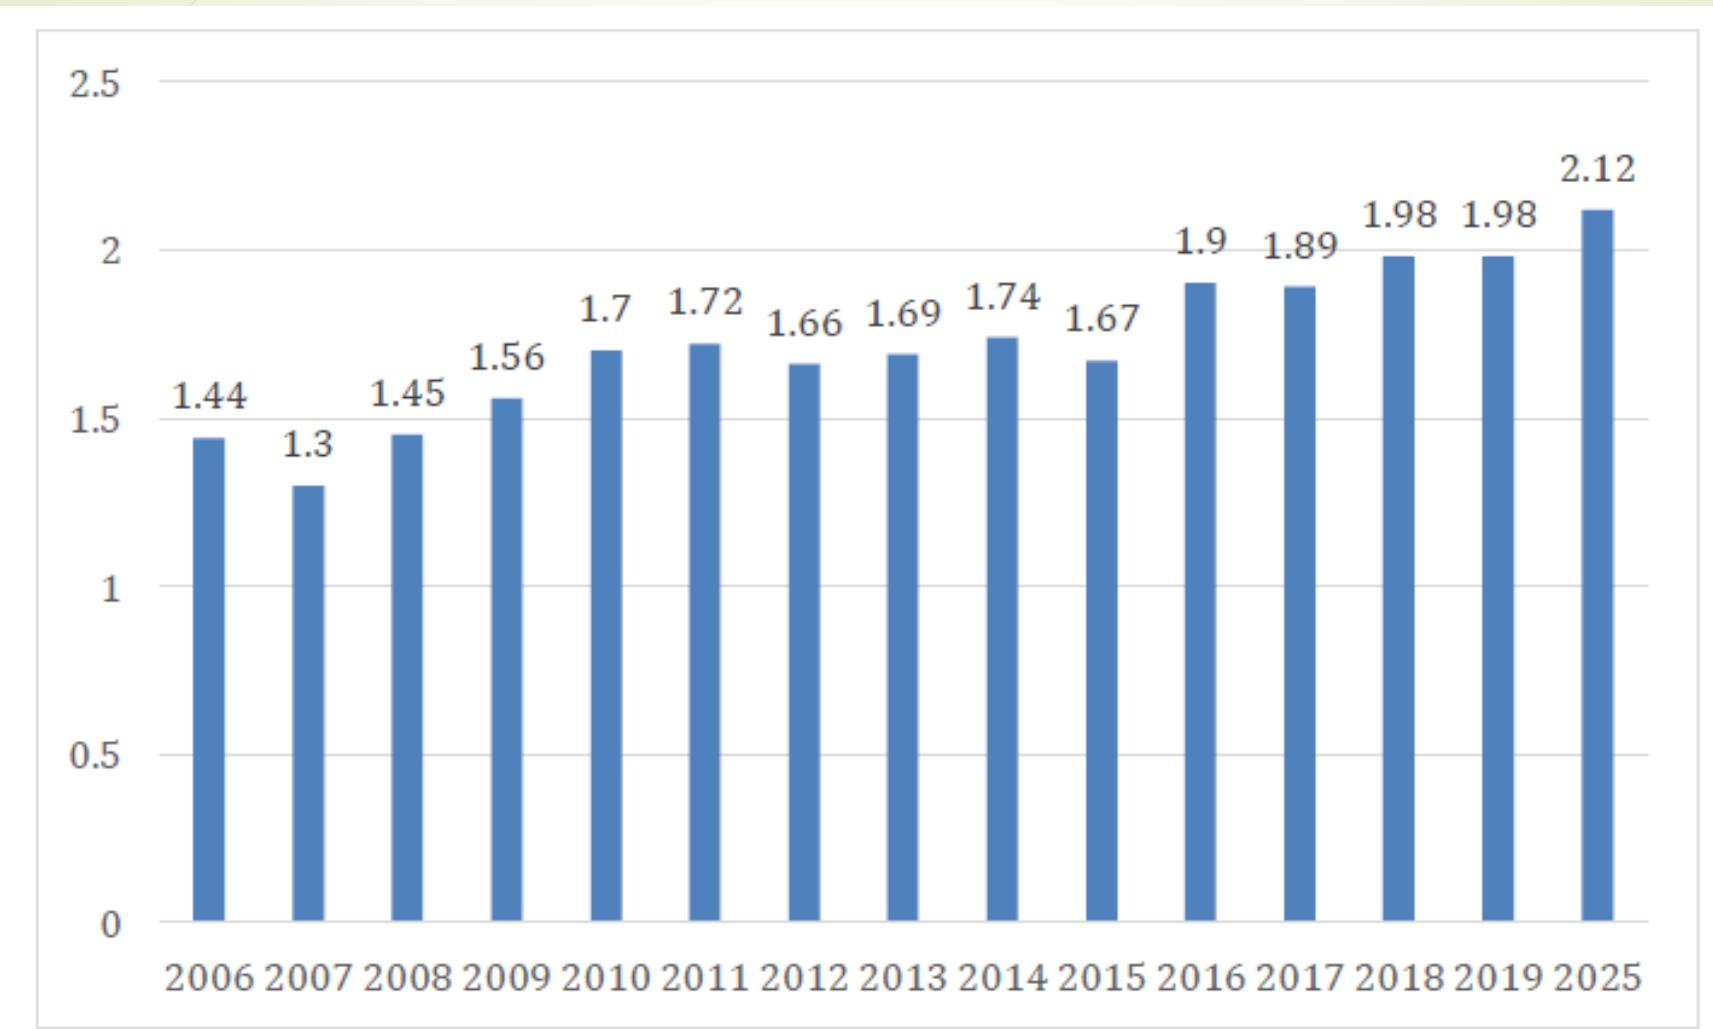

Buffalo VS Cattle

- Daging kerbau mengandung **lemak** lebih kecil dari daging sapi
- Kandungan **lemak jenuh ganda** (PUFA) daging kerbau lebih kecil dari daging sapi
- **Warna** daging kerbau lebih merah dan relatif lebih gelap dari daging sapi
- **Marbling** pada daging kerbau relatif buruk
- Kandungan **kolagen** pada daging kerbau relatif lebih banyak dari daging sapi – **kurang empuk**

Isu Pemenuhan Daging Merah

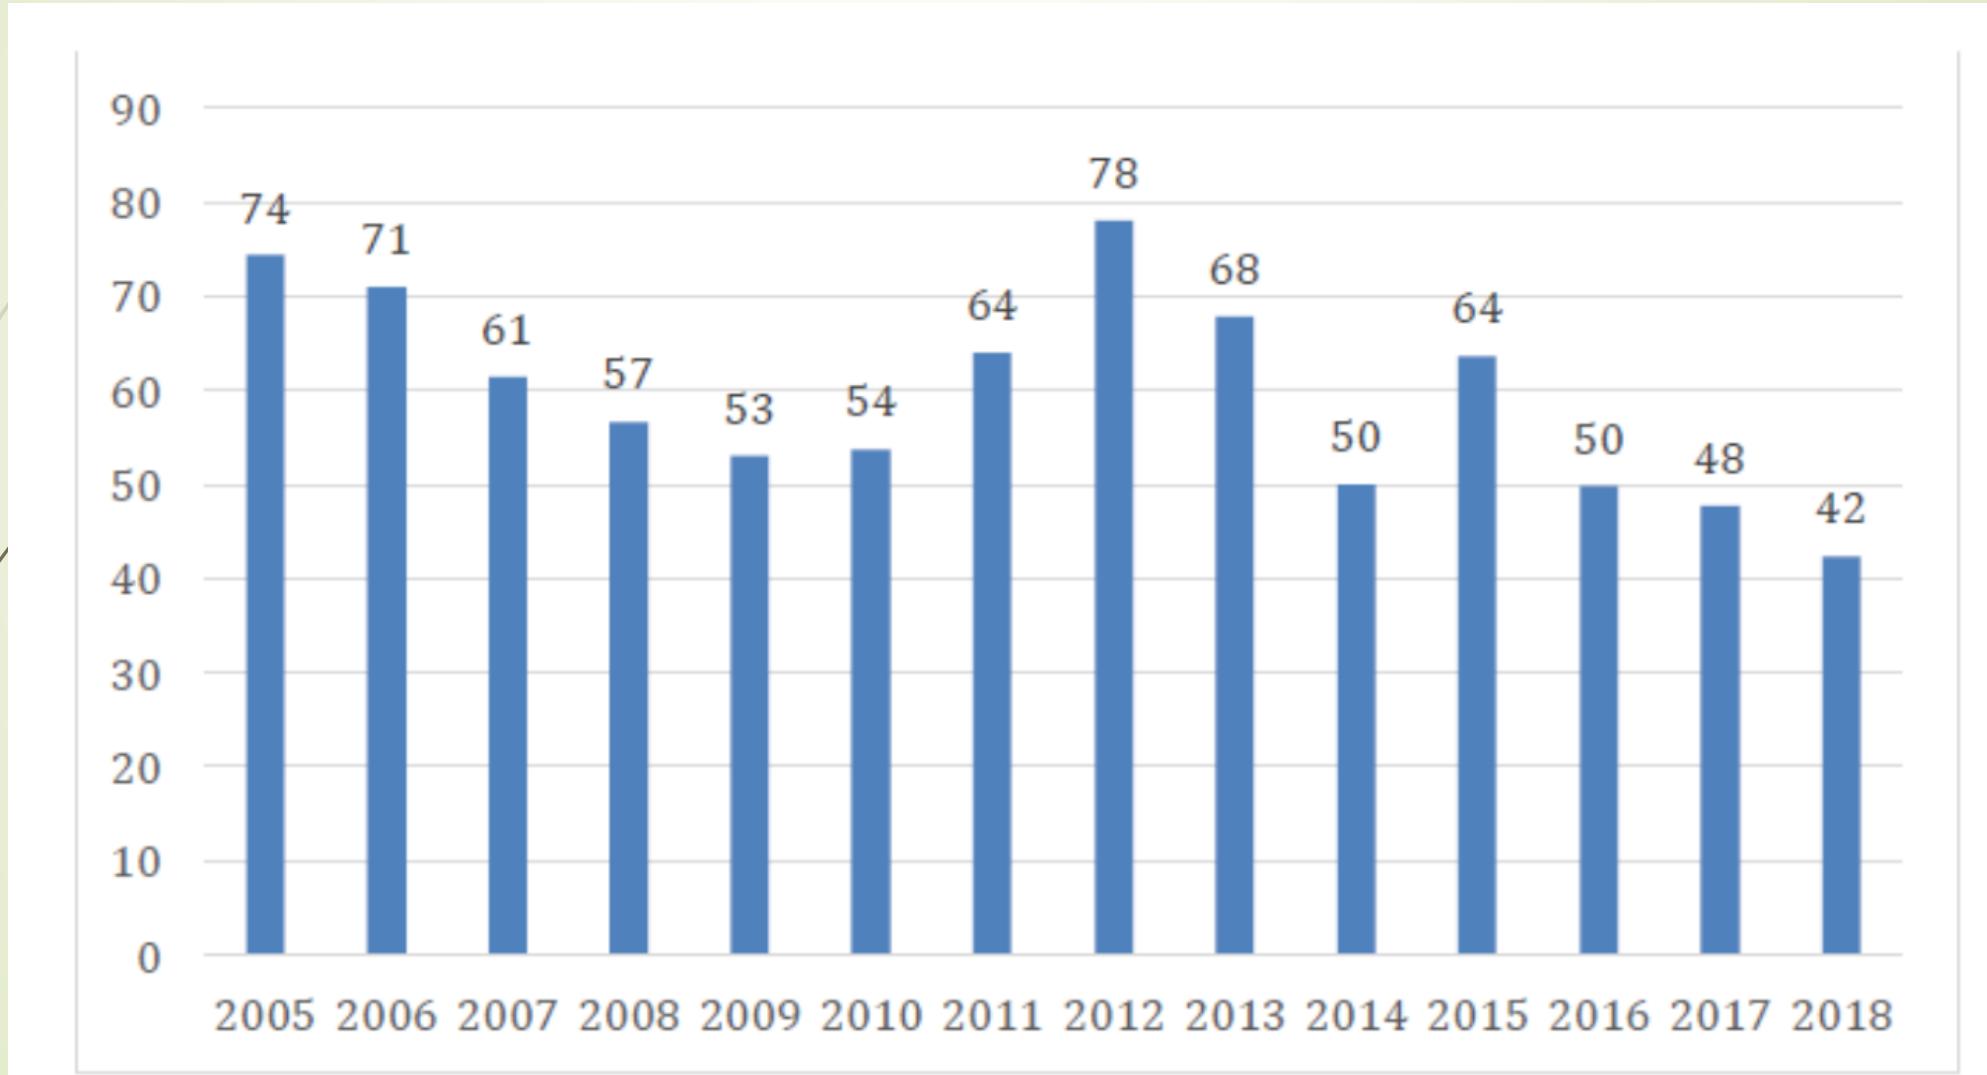

- Dipenuhi melalui impor sapi hidup dan daging, khususnya Australia
- Situasi di Australia:
 - Bencana dan perubahan iklim menyebabkan penurunan populasi sapi
 - Restocking sapi → pengurangan export
 - Terbatasnya sapi bakalan → Kenaikan harga sapi
 - Permasalahan bagi Indonesia
- Skenario bagi Indonesia
 - Jangka pendek → alternatif import dari negara lain? Pemotongan stock sapi dan kerbau dalam negeri?
 - Jangka menengah → pemanfaatan sumberdaya produksi daging merah dalam negeri

Proyeksi kebutuhan daging merah nasional

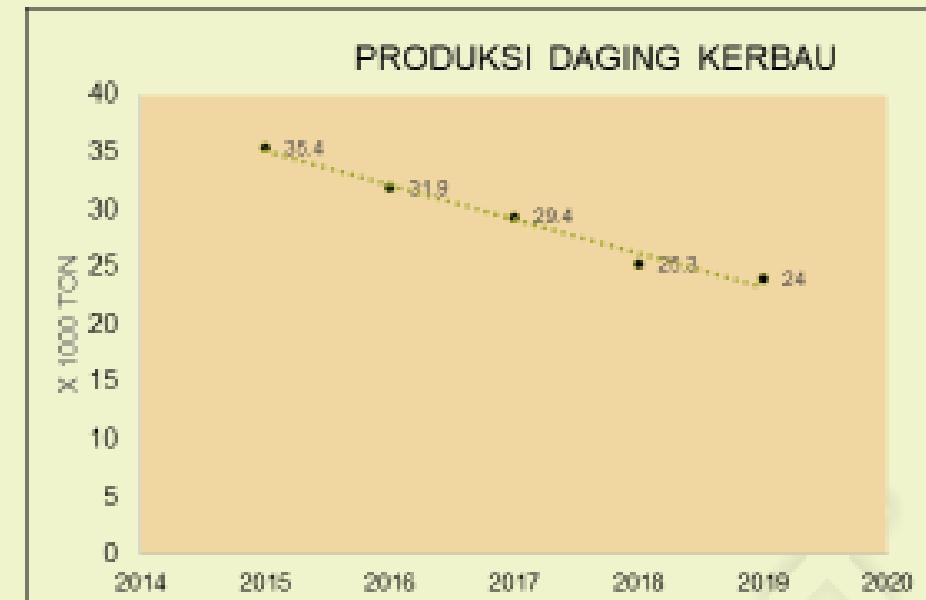

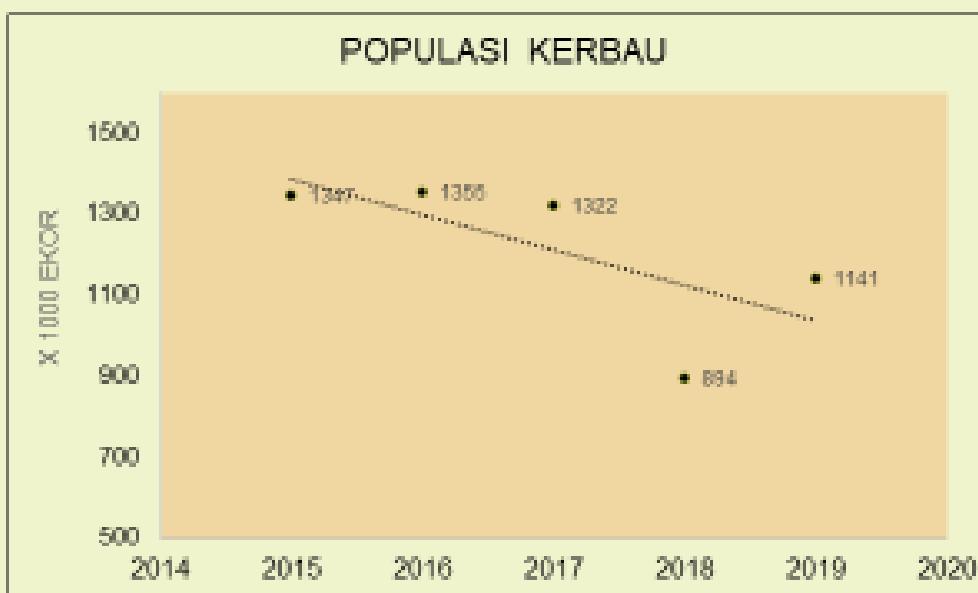

Source: Chang et al. (2020)

Kecukupan daging merah (%)

Source: Chang et al. (2020)

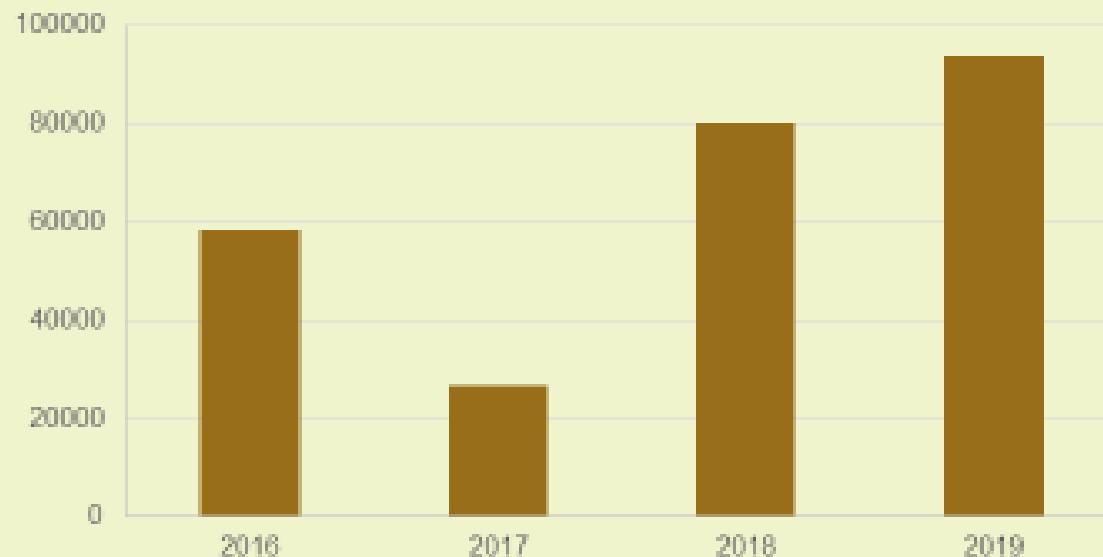

Apakah Kerbau dapat diharapkan?

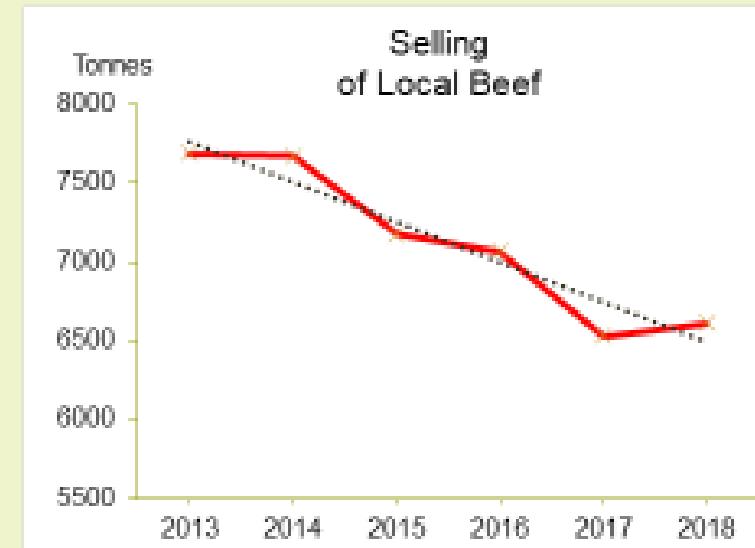

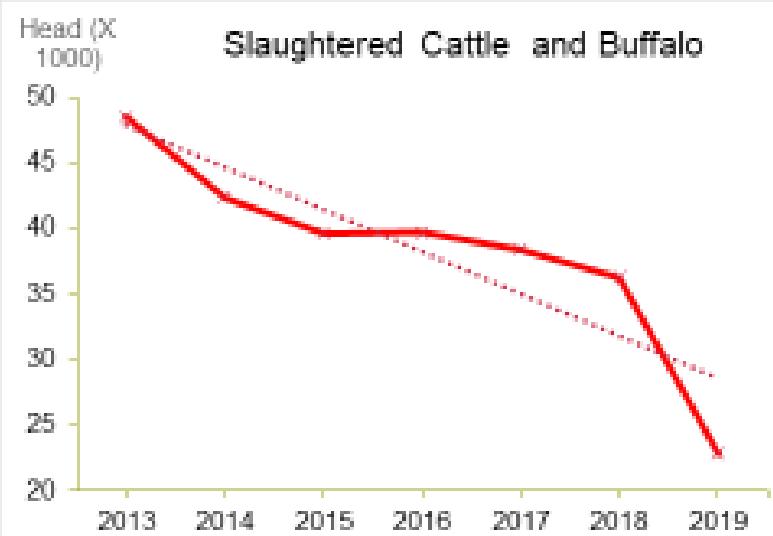

Source: BPS dan Ditjen
PKH

Impor Daging Kerbau (Ton)

- Harga eceran IBM Rp. 75-90 ribu/kg
- Konsumen utama pembuat bakso, restaurant, catering dan sebagai campuran daging sapi segar

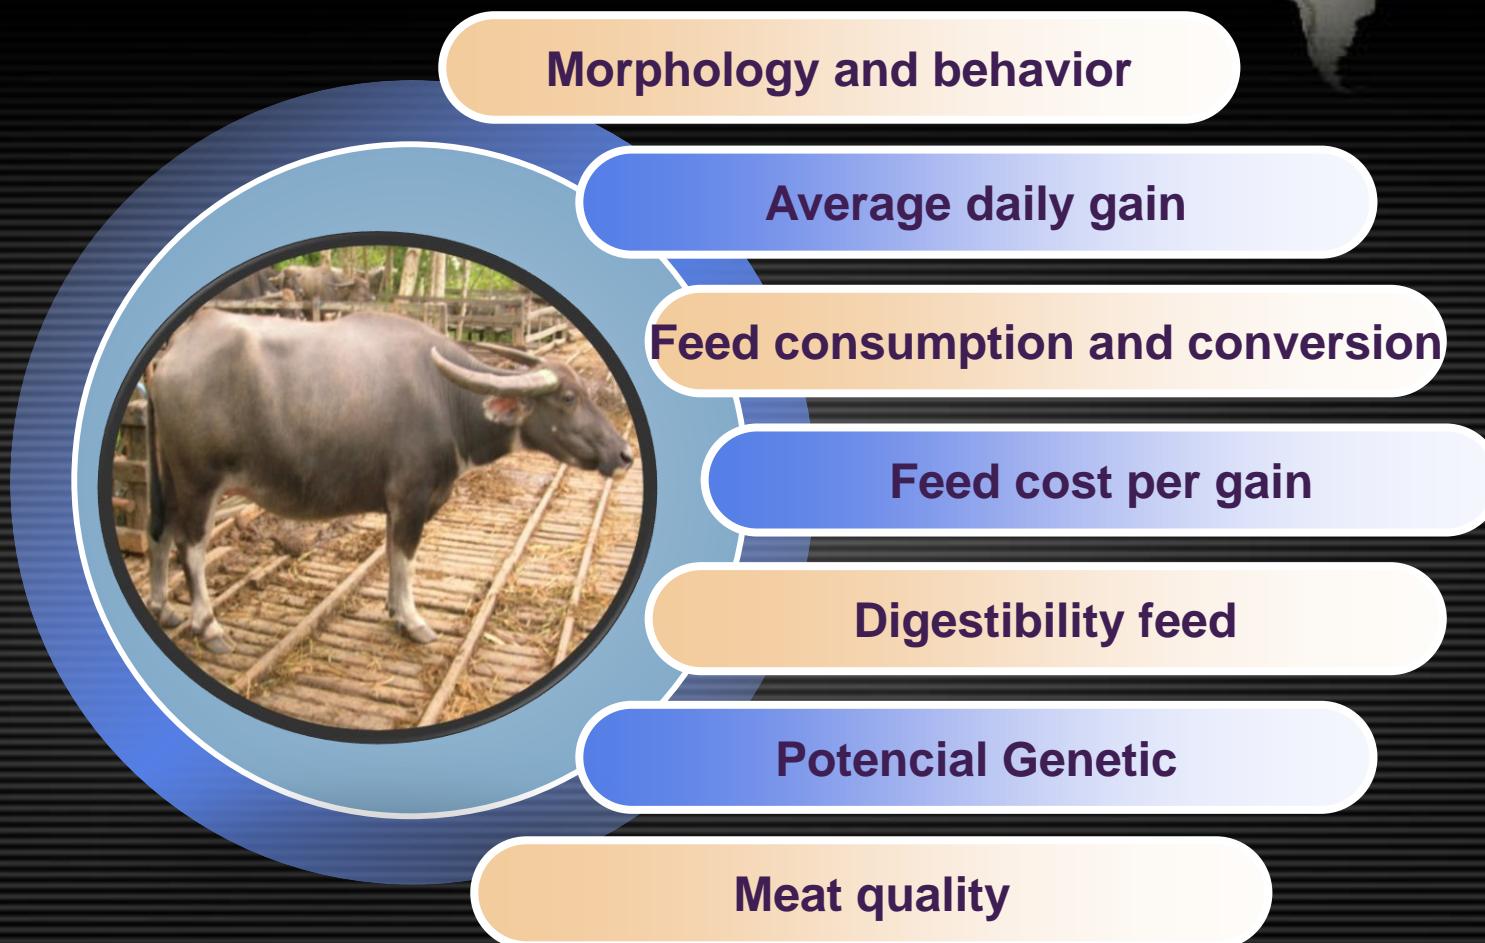

Dampak Impor IBM di Kaltim dan Kalsel

Prospek kerbau

- **Kerbau** memiliki potensi besar untuk mendukung pemenuhan kebutuhan daging merah, khususnya pada daerah yang tidak mendukung untuk pengembangan sapi potong
- Masuknya **IBM** menunjukkan penerimaan konsumen terhadap daging kerbau
- Terbatasnya suplai bakalan dari Aus saat ini berpotensi menyebabkan semakin **turunnya** populasi kerbau
- Perlunya **upaya** peningkatan populasi dan produktivitas kerbau melalui: perubahan orientasi peternak, perbaikan sistem produksi, tata laksana dan breeding

CHALLENGES

Terima Kasih

Thank You for your attention

MULAWARMAN university

Parameter	Kerbau Rawa (Swamp Buffalo)	Kerbau Sungai (River Buffalo)
Domestikasi	4000 tahun yang lalu di Cina Selatan	5000 tahun yang lalu di India
Karakter Fisik	Postur tubuh lebih kecil dari KS	Postur tubuh lebih besar dari KR
Habitat	daerah tepian pantai, tepi sungai dan muara, rawa dan danau, padang sabana, padang rumput yang kering, hutan tropis	di sekitar sungai-sungai yang ditumbuhi banyak vegetasi
Kromosom	24 Pasang	25 Pasang
Utilitas	Penghasil daging	Penghasil susu
Warna Tubuh	Abu-abu, abu-abu kehitaman, abu-abu gelap, abu-abu kemerahan hingga belang hitam putih.	Hitam mengkilap, abu-abu gelap, coklat, abu-abu dan belang hitam putih.
